strongly to lovers man paump associates and round arms. And the balancing of phrases has taken the place in popular favor of the circling in a waitz.

THE English dominions are in every quarter of the globe, so that somewhere the sun is falways shining upon British soil.

A big government, that. But it will not be long before America will have stretched out her hand and put a distinctive mark on more territory than that under the British sovereignty. Reports are coming in that the tour of the All-America and Chicago Base Ball cloos around the world has been effectual. Clubs are being formed everywhere for playing the national game of the United States. There are eleven in Australia, one being composed entirely of Maories, who are entusiasts. The game is replacing cricket in England. And as its merits are becoming more and more known the base-ball crank is coming to the fore all over the world. A new era is dawning—the era of the new international association of base-ball cranks, with authority over the whole-earth, will be in Chicago, the city which is responsible for the awakening of the love of the great game in the breasts of hungering peoples.

If does not pay for weak territories to enter the union of States. North Dakota is on the verge of bankruptey. Her expenses since she became a State have largely increased. She pays \$61,000 more in salaries and \$100,000 for her legislative expenses. The Governor has estimated the total available receipts at \$244,898, and there will be a deficiency the first year of statebood in the public treasury of about \$300,000. The scheme of government adopted in the new constitution is one cause of this state of Yey Yrk. Other things are on an equal scale with the boundiess enthusiasm of the West, North Dakota bet the limit, and will have to take the consequences. The four Territories that are now clamoring for admission might do well to send men to the capital of North Dakota better limit, and will have to take the consequences. The four Territories that are now clamoring for

A DISPATCH from Bridgeport, Conn. says: It is getting to be quite the thing for married women and young ladies who have ceasion to go out alone after dark, espeoccasion to go out alone after dark, especially on the more unfrequented streets, to carry revolvers. For several weeks past there has been a reign of terror among married women and young girls employed at the factories about the city, owing to the conduct of some fiend who has not he sitated to annoy them. At first the wretch began by following and merely speaking to women whom he chanced to see out after dark unaccompanied by an escort. Later he grew more bold, and several times women have been chased.

OF ALL the recent "accidents" which make a sort of nightmare of the Comedie Humaine, the boiling to death of a patro Itumaine, the boiling to death of a patron of a public bath in Kokomo, Indiana, seems the most extraordinary. The victim, aged, and unable to help limseif, was put in a hot bath by an attendant, who thereupon went to bed and left the poor wretch in the tub, "with the gas burning beneath it." The drug clerk's dispensing of aconite for ammonia is small beer compared with this illustration of absence of mind. It is really one of those forlorn conjunctions in which

lays previous Miss Mattie Bryant, of Shelbyville, Tenn., a beautiful and wealthy young lady, went to Chattanooga to visit friends. Soon after Captain J. Perry Fyffe, a prominent young lawyer and militia captain, met Miss Bryant. On the 19th the two went for a ride, the first time they had been together. Captain Fyffe said, "Pll dare you to yet married today." In which the on to get married to-day;" to which the irl replied, "I'll go you." They immedi-trove to the court-house, procured a license, ent for a minister, and went to the liouse of a friend, where they were married.

FROM FOREIGN LANDS.

Notes of Interest By Wire and Mail From Beyond the wea.
Besides the influenza Europe is threat-

ened with an epidemic which has probably never before invaded its territory. It has its cradle in the peninsula of the Ganges, and is called the red fever of India. It is an eruptive maladay, disclosing some of the characters of measles and scarlatina. There are in reality two eruptions—one initial and the other final. The attack is sudden, with weakness, lassitude, pain in the head and affected eyes, and then the first cruption appears in the form of red blotches, as in scarlatina. The final cruption becomes apparent from the fourth to the sixth day, and resembles that of measles, affecting the feet, hands and limbs, and disappearing in its turn after a duration of twenty-four hours. Convalescence is rather slow. The disease has hitherto been confined chiefly to Asia, but it has recently appeared at Connever before invaded its territory. It has its Asia, but it has recently appeared at Con-stantinople and at Prevesa. It is extremely contagious, but the lateness of the seasor may prevent its general spread through

THE following is from the Harleian Mauuseript, No. 2252, in the British Museum,

Fall upon a Wednesday.
Fall upon a Wednesday.
There shall be a hard winter and strong,
With many hideous winds ameog.
The summer merry and good shall be,
And that year wheat in great plenty;
Yeung folks shall die that year also,
And ship at sea shall have great wee,
Whatever child that day born is,
He shall be doughty and gay, I wis;
And whise and crafty also of deed,
And find many in clothes and bread,

THE Toronto Empire, the government or an, says: "The reports which have bee scattered broadcast throughout the United States to the effect that the government intends not to renew the modus vivendi next year are entirely unwarranted. By the treaty of Washington act, passed by the Dominion parliament last year, the modus vivendi expires on the 15th of February next, and in order to renew it further legislation will be required. Whether it will be renewed or not involves a question of policy which the government has not yet considered." cattered broadcast throughout the United

Just as Paris, careless about her sewer age after the great exposition, is suffering the penalty for such slights to the goddess of health in a fearful increase of her death rate and the prostration of thousands of her citizens, so may American cities pass through a similar fearful experience. The grip found in the gay French capital as congenial a field of operation as it found in Russia. Let it not be said that in Richmond, by sparing the broom and the disinfectant, the door was opened to la grippe and any attendant malady in her train. Eternal vigilance and eternal effort are the price of health. the penalty for such slights to the goddess

PARNELL is passing through the same ort of experience as that of Alexander

Hamilton. The latter was a statesman to Hamilton. The latter was a seriest of the come by domes are indications that the fluence of Parnell will in like not seriously affected by proof of immorality. But in this least public sentiment is not its political leaders as in Han No one to-day can rise so high tics of this country that he assume kingly prerogatives, a adornments the vices which overwhelming disgrace to his station.

PERSONS AND THINGS.

New Notes Compiled From the "Times"

Exchanges.

JOHANN STRAIGS, who has written more good dance music that any other living mat, is alout to revive the waltz by combining it with a minute so that convenation between dancers many be possible, the light in the matter how delicious the nusic the women sit languidly about the room and the men sit languidly about the room and the men is longer smound the docoways, all presumably waiting for supper to be served. So says the musical and the conversation personnel of the light in the longer and our mount of this age are degree.

"Well, Dennis, did that porous plaster help your lame back?"
"Fwell, doctor, Oi can't say that it has helped me much yet, but mebbe it will.

fered with business. There was no business, and hard to tell what the market was. There has been a disposition all day on the part of shorts to cover and even up for the year. This would have carried wheat higher but for free selling by a large local operator, and the close was \$23 to for May. The decrease of \$64,000 bushels in amount on passage, and expected decrease in stocks in great Eritain were the principal bullish features. Cables firm. Corn—A great deal of January was sold out to-day, and May brought in its place. We are quite likely to have a big movement and delivery early in January, possibly somewhat lower prices. When that time comes we believe it will be good judgment to buy for a fair profit. Cables steady. Oats steady since they have reached 22c. for May. No amount of weakness in other products on the floor seem to have any effect on them. Provisions have been dult to-day, 50 to the floor seem to have any effect on them. Provisions have been dult to-day, 50 to the products on the floor seem to have any effect on them. Provisions have been dult to-day, 50 to the products on the floor seem to have any effect on them.
